

Institution: Manipal School of Architecture & Planning, MIT Campus

Feedback on services at Manipal Academy of Higher Education

Total no. of feedback forms – 76

Year: 2019-20

Comments:

Justification for score less than 3

- Can be more responsive
- The old hostel need to be maintained well. Architecture academic block can be improved with better facilities.
- The gym was closed year long and no common room facilities were working.
- Can improve further
- improve the ventilation in hostels
- They are not relevant in practicality.
- On campus wifi is very poor and slow. Even after repeated complaints there is no improvement.
- not up to date
- Scores less than 03 were given since those services were never met by the campus or simply because they exist only in terms of a title and no action is held.
- Because of the schedule skin is peeling, fevers back supports wrist supports and constant stress for students and teachers
- Very bad
This sem they gave a lot of work its too stressful amounts of work in architecture
Not like other courses, design subject n all other works its justa. Pot of work
- I haven't given score less than 3
- Not much options are there for Architecture (B.Arch) students.
- Furniture in hostels are a huge problem for MSAP students as drafting isn't easy and after getting a drafting board, it occupies all of the space in the room. Also, Food Court 1 mess food is not upto the mark. Both the food courts should have same quality of food but, FC 2 is way better than FC 1.
- hostel spacing and amenities for an architecture student is not enough and not upto the fees taken
- Response time
- i dint give less than 3

Any other services recommend to add

- no
- More hostel recreational services need to be added or improved.
- Yes, please allow my juniors to take part in NASA.
- It would be nice to see some rennovation and laundry facilities in older hostels
- Shading on pathways from AB-5 TO Food court
- Hostels should be equipped with a fridge. Only first year hostels have this and senior hostels are of poorer quality in comparison. It would be nice to have a small kitchenette (common) to keep food in the fridge or just cook something small
- parking facilities for students closer to entrance

- Not of anything I know apparently
- Better tables and chairs for architecture students for all years.
- More recreational facilities
AC classrooms
- The grievance redressal especially for academics must be improved. Designing a curriculum for architecture must be separated from other courses considering the intensity
- Everything was absolutely great in the campus
- Proper drafting tables in hostels for MSAP students.
- better hostel services
- More live projects as our experience with them through MAHE has proved useful.
- please provide remote access to mit library and college institution id and password to log in few restricted site for our researched based studies for masters students.

Strength

- organised
- The numerous variety of courses available at the University is great and it gives the opportunity to meet different kinds of people from different parts of the world. This gives a lot of exposure to the students.
- Great campus life
Very professional tutors
- Lot of opportunities for different fields of interest
Well versed faculty
- Cares about welfare of students, cleanliness and good facilities.
 - Vast campus
 - Diverse student population
- Education, facilities, campus, security
- Good infrastructure
- Well maintained campus,
- Overall infrastructure is good.
Good campus experience
- good campus
- The student community and the universities guidance
- Enough stores to buy items
- Freedom as a student; Most of everything is under the vicinity of a student.
- good ambience and social atmosphere.
plenty of opportunities to nurture self growth
- Good infrastructure
- Facilities, number of teachers
- it is a diverse instiutuion .
- Very good ambience
- Clean, Green, Social and Gathering Spaces
- All of its infra availability is excellent
- Spacious, teachers are friendly
- Dedication of professors.
College Environment and facilities for recreation.
- faculty and lively environment
- Best teaching faculty
- 2. Clean and hygiene campus
- any service required is fulfilled
- Great exposure and interactions with professionals from different walks of life
- teachers have good knowledge about subjects

Weakness

- responsiveness

- Poor hostel common facilities
- Old infrastructure needs to be renovated
- Better syllabus for electives(b arch)
- Could improve on certain teaching aspects.
- Accomodation, infrastructure in certain depts
- low maintainance
- Architecture Building classrooms are not well maintained. The drafting tables as well as chairs are in bad conditions. Urgently need to be replaced with new ones.
- 2. Exam marks and Grades are declared very late in B.arch course. This is ironic because, MIT despite having thousands of students, still get their grades earlier than us.
- The student section should be more regular with email responses- most of the time we get no response or very late ones (MSAP)
The drafting tables for architecture students need to improve
- students not getting same facilities according to their branches and based on the fees paid (MIT having airconditioned facilities whereas MSAP having fans, while having hands-on work in curriculum)
- Could better up the spatial infrastructure for every course in manipal
- Campus store becomes too expensive for architecture stationary.
- Exposure; Infrastructure
- lack of management skills for co curriculars to be enjoyed to the fullest.
- Faculty
- Grievance redressal, delusional scheduling
- the scheduling and planning of the assignments and submission arent equally distributed throught out the semester there by craeting a lot pressure and stree on students.
- Too many assignments are given to the students. Feedbacks from are not even considered.
- I have no complaints.
- Wasting materials for studies
- College distance from hostels.
FC 1 food.
- i dont find any
- fees structure could be more linient
- 3D printing facilities is seldom available
- off the class few teachers are not available to clarify our doubts.

Suggestions/Comments/Campus Experience

- Perhaps open a workshop facility with good machines and tools inside the college which the students can use to build the models if they choose to, cause not much space in hostels. Otherwise, good experience. The college cared about us, it was evident. Thank you.
- Renowned institute with an extensive campus and an assortment of facilities provides students a wholesome college experience.
- I had the best campus experience and career opening at Manipal university. The campus facilities and educational infrastructure are worth mentioning. Loved the experience, would any day recommend to join Manipal
- The campus has construction work going on 365 days. There is always Construction Activity Noise on Campus.
- Wonderful
- Amazing college experience with a lot of activities to take part in and academic wise also.
- To keep sports facilities free of charge so more people utilize it.
- Do work on better infrastructure for the general public. Say for hostels. I do stay at NIH-C, but it's sad to see that only a person who can afford money can stay at a decent hostel. And at the other end, others have to stay at very bad conditions along with bathrooms shared commonly among students. The public areas in these hostels are very filthy, giving a student, depressing vibes. I mean we are in 2020, it's time to change this up. At least, brighter lights, better furniture, painted and treated walls can give a difference. If Manipal is aiming towards an International market, do make sure to keep its standards within the same area. Definitely, Manipal might be the best

providing private university in India, but let's aim on providing the extreme best in our region.

And sad to see varying rules in different hostels and a gender differentiation between the rules in a hostel. Guys can bribe their security to exceed their perm time and their biometrics stand no importance. On the other hand, girls are given three fines before being expelled or adding in the black list if they miss on their perm.

The classrooms, academic areas are decently modern at some spots in the campus and in others, you are at a government university level.

Marena is pretty nice. Got no complaints on that.

Maybe you should permit students with their vehicles go inside the campus. Give them a time limit so that they don't stay in for a long time.

Basically, bring in more to adjust with the lifestyle of a normal student of present times. Let's get rid of the old Manipal vibes and give it a new outlook. And this way or other, let's prevent the culture of some students sneaking out hostel or secretly bringing in cigs or drinks to hostel. You put in most number of rules, the more students try to go against them.

- Appoint good faculty
- Just give a more moderate schedule - formative summative sessional jury and reading material from before is punishing not teaching
- Please fix curriculum
- No suggestion
- Address Student Problems
- Great experience..a lifetime's experience
- For architecture students hostel curfew has to be removed cause we have to spend the night working and will require stationary, food etc at late night .
- So far the experience has been fruitful, I'm learning more about myself after I've joined the course and the study environment is quite good.
- nope
