

## **Neurology Department, KMC, Manipal**

### **1. Why to choose DM Neurology at KMC Manipal?**

The department of Neurology is one of the oldest and well-established neurological services in India. It was established in 1981 and since then has witnessed tremendous growth keeping in pace with recent advances. The Neurology OP services cater to a wide variety of neurological syndromes ranging from, migraine, epilepsy, dementia, demyelinating disease, neuromuscular disorder. A busy electrophysiology lab provides supportive diagnostic services like Nerve Conduction Studies, Electromyography, Electroencephalography, EEG. Allied departments like radiology provide other diagnostic services like CT / MRI Angiography. Neurosurgical and Neurorehabilitation services provide necessary surgical and rehabilitation support. Adequate exposure to patient care protocols, personal attention from faculty, academic programmes with emphasis on theory and clinical skills, make it a good programme to learn the fundamentals Neurology. Regular academic programme with Seminars, Journal Clubs, Clinical case discussions supervised by faculty ensures comprehensive training to the candidates. Neurology as a branch is seeing exciting developments and future career prospects in academic or private institutions becomes easily accessible after the 3 years training programme. All our earlier trainees have been recruited as consultants in well-established centers of their choice.
